Update: Two-Month Detour from Northbound Route 123 to Tysons Boulevard to Start April 23

Northbound Traffic to be Detoured to International Drive Near Tysons Galleria

Drivers in Tysons Corner can expect another significant traffic pattern change near Tysons Corner Center and Tysons Galleria in April.

On or about April 23, the left-turn lane from northbound Route 123 to westbound Tysons Boulevard will be closed for approximately two months as Dulles Corridor Metrorail Project crews will be starting construction of caissons and piers to support the foundation of the Tysons Central 123 Station. The station is being built on the southwest corner of the Route 123 and Tysons Boulevard intersection, across from Tysons Corner Center.

Traffic will be detoured on to International Drive, a block before the Tysons Boulevard intersection, to a right on Galleria Drive. Drivers can then turn left on Tysons Boulevard or proceed straight. Drivers seeking access to Tysons Galleria from northbound Route 123 should stay on International Drive or use Tysons Boulevard. Drivers seeking to access Westpark Drive and the Westpark Bridge to Tysons Corner Center should continue on Galleria Drive which becomes Westpark Drive. (*See attached map.*)

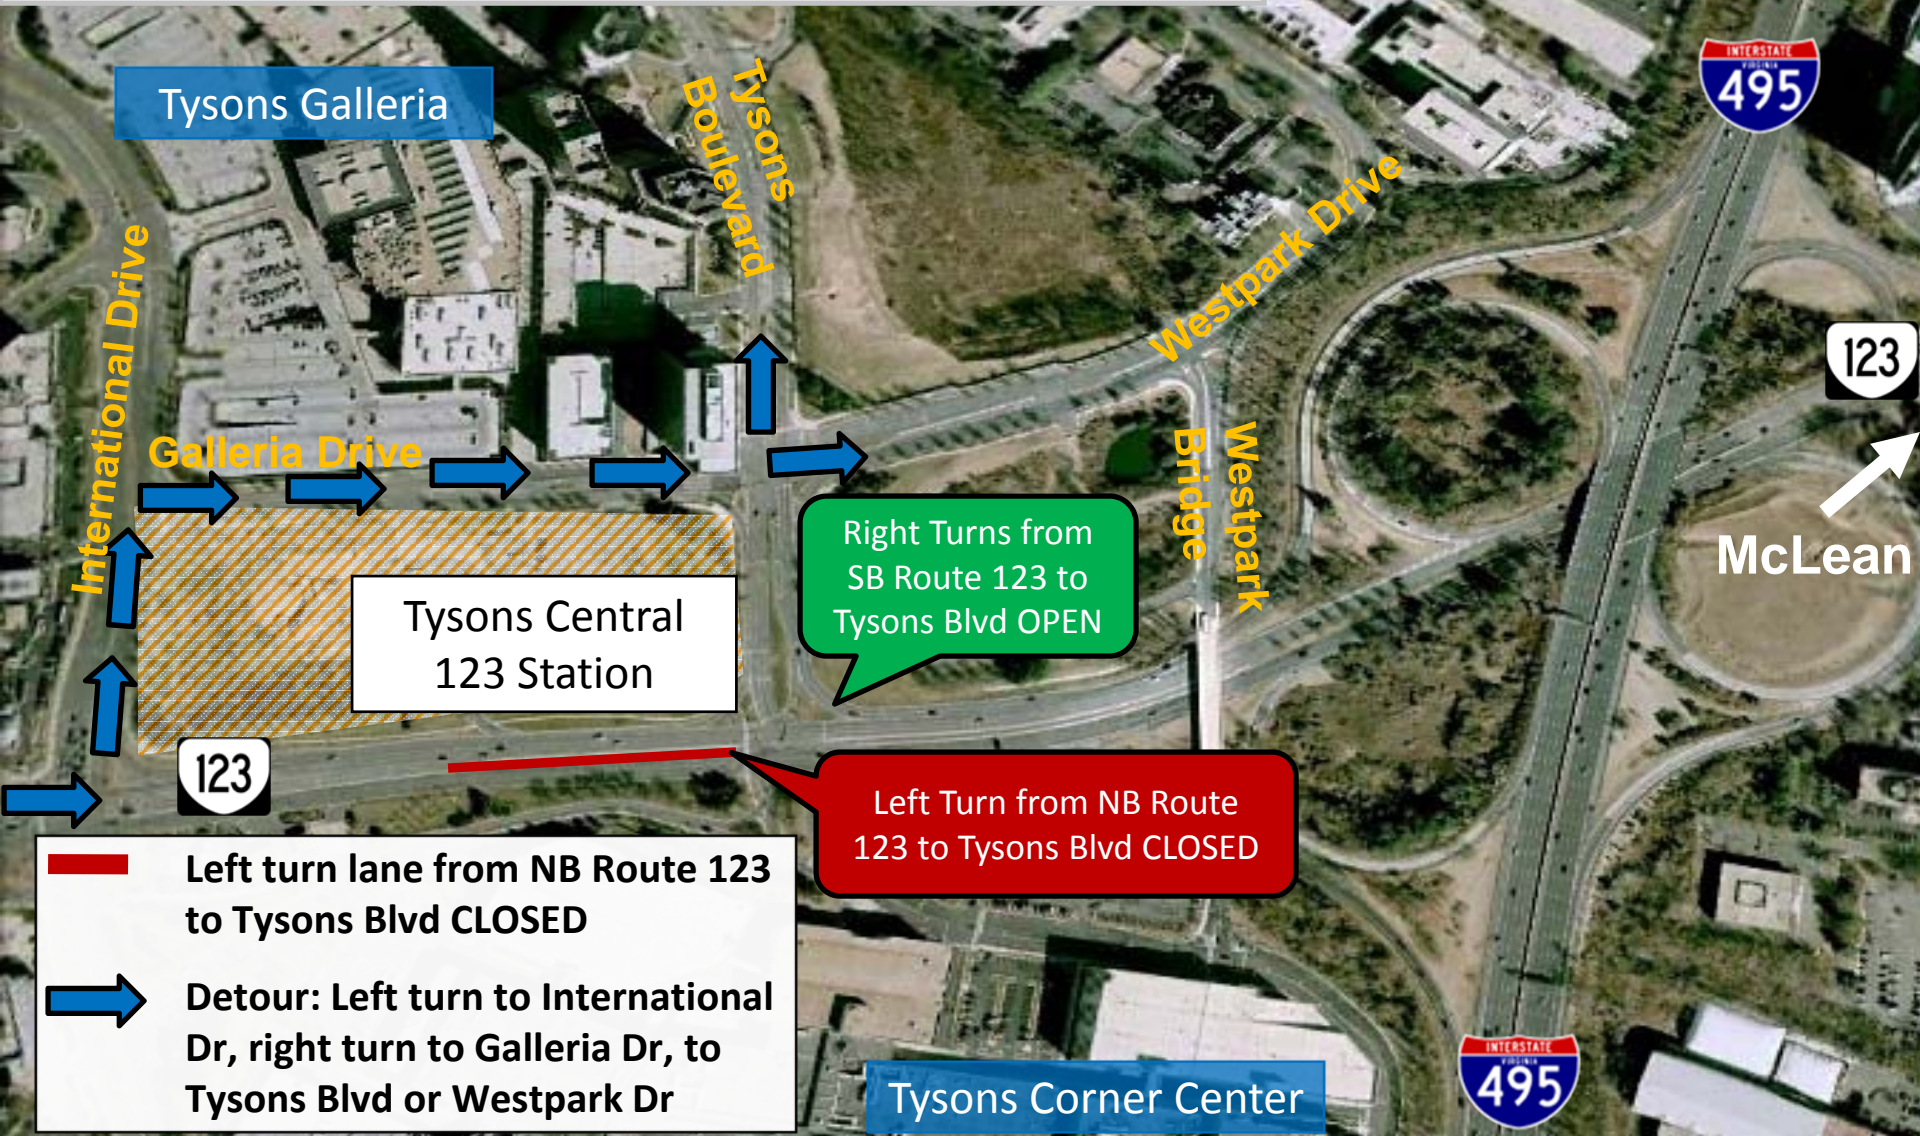

Southbound traffic along Route 123 will still be able make right turns on to Tysons Boulevard using a modified turn lane.

This detour is immediately adjacent to the project's construction headquarters where there is a high volume of truck, equipment and auto traffic. Motorists are urged to use extreme caution in this area.

All work will be done weather permitting. This work was previously scheduled to begin April 9.

If you have any construction-related emergencies, please call the Dulles Corridor Metrorail Project Hotline at 877-585-6789. For additional information about the project, please visit our project website at www.dullesmetro.com or call 703-572-0506.
