Important Lane Closures April 19-25, 2010

Caisson Load Test Scheduled for Tuesday, April 20

Crews will perform another caisson load test located at the southeast corner of the old MITRE property, by the exit ramp from the eastbound Dulles Toll Road, on Tuesday, April 20, sometime between 9:30 a.m. and 11:00 a.m. State police will halt traffic along Route 123 and at the exit ramp from the Dulles Connector Road/Dulles Toll Road for a brief period (less than ten minutes) when the test occurs.

The test will produce a very loud noise that is likely to be heard by residents, office workers and motorists near the testing area. The noise will vary based on weather and other environmental conditions, but will sound like an explosion.

Intermittent Late-Night Closures of Dulles Airport Access and Toll Roads Wednesday, April 21

All eastbound and westbound lanes of the Dulles Toll Road and the Dulles International Airport Access Highway will be temporarily closed four separate times overnight Wednesday, April 21 and early Thursday morning, April 22. Crews will be relocating power lines just east of the Hunter Mill Road interchange, weather permitting.

At 11 p.m. Wednesday, April 21, Metropolitan Washington Airports Authority police will begin setting barriers and tapering off the lanes leading to the full closures. Traffic will be stopped in 15-minute segments between midnight and 2:45 a.m., then all of the lanes will be reopened. These closings will also affect both the westbound off-ramp and the eastbound on-ramp from Hunter Mill Road.

Overnight Ramp Closures

Eastbound Dulles Connector Road to Northbound Route 123

Between midnight and 5 a.m. overnight Sunday, April 18, the exit ramp from the eastbound Dulles Connector Road (Route 267) to northbound Dolley Madison Boulevard (Route 123), toward McLean, will close so crews can repave the ramp.

Traffic will be detoured by using the exit to southbound Route 123, then turning left on to northbound Route 123 at the signalized intersection.

Southbound Route 123 to Southbound I-495 Capital Beltway

Next Friday and Saturday nights, April 23 and 24, crews will close the on-ramp from southbound Route 123 to the southbound I-495 Capital Beltway (Outer Loop). They will be lifting a large rebar cage for pier construction at that interchange. The ramp will be closed from 11 p.m. to 5 a.m.

To access the southbound Capital Beltway (Outer Loop), drivers will detour by continuing on southbound Route 123, turning right on International Drive, right on Galleria Drive, right on Tysons Boulevard, then by making an immediate entrance to the southbound Beltway.

Significant Work Along Leesburg Pike (Route 7) Continues

Drivers in Tysons Corner can expect a very large amount of construction work in both directions of Leesburg Pike (Route 7), between the Dulles Toll Road (Route 267) and Chain Bridge Road (Route 123). Crews are working in many different areas to complete utility relocations, and paving and restorations. At the same time, additional construction on retaining walls and service road closures are preparing for the major traffic shifts in the median around where the two future Metro stations will be built.

Work on Leesburg Pike (Route 7) is scheduled for daytime and nighttime hours all next week.
