Reminder: Northbound Route 123/Tysons Boulevard Detour Starts Friday Night

Northbound Traffic to be Detoured to International Drive Near Tysons Galleria

Northbound traffic on Route 123 will not be able to turn left on to Tysons Boulevard beginning Friday night, April 30, weather permitting.

Northbound drivers instead will be detoured to a left turn at International Drive, one block before reaching the westbound Tysons Boulevard intersection because the left turn lane will be closed for approximately two months.

Traffic will be detoured on to International Drive to a right on Galleria Drive. Drivers can then turn left on Tysons Boulevard or proceed straight. Drivers seeking access to Tysons Galleria from northbound Route 123 should stay on International Drive or use Tysons Boulevard. Drivers seeking to access Westpark Drive and the Westpark Bridge to Tysons Corner Center should continue on Galleria Drive which becomes Westpark Drive. (*See attached map.*)

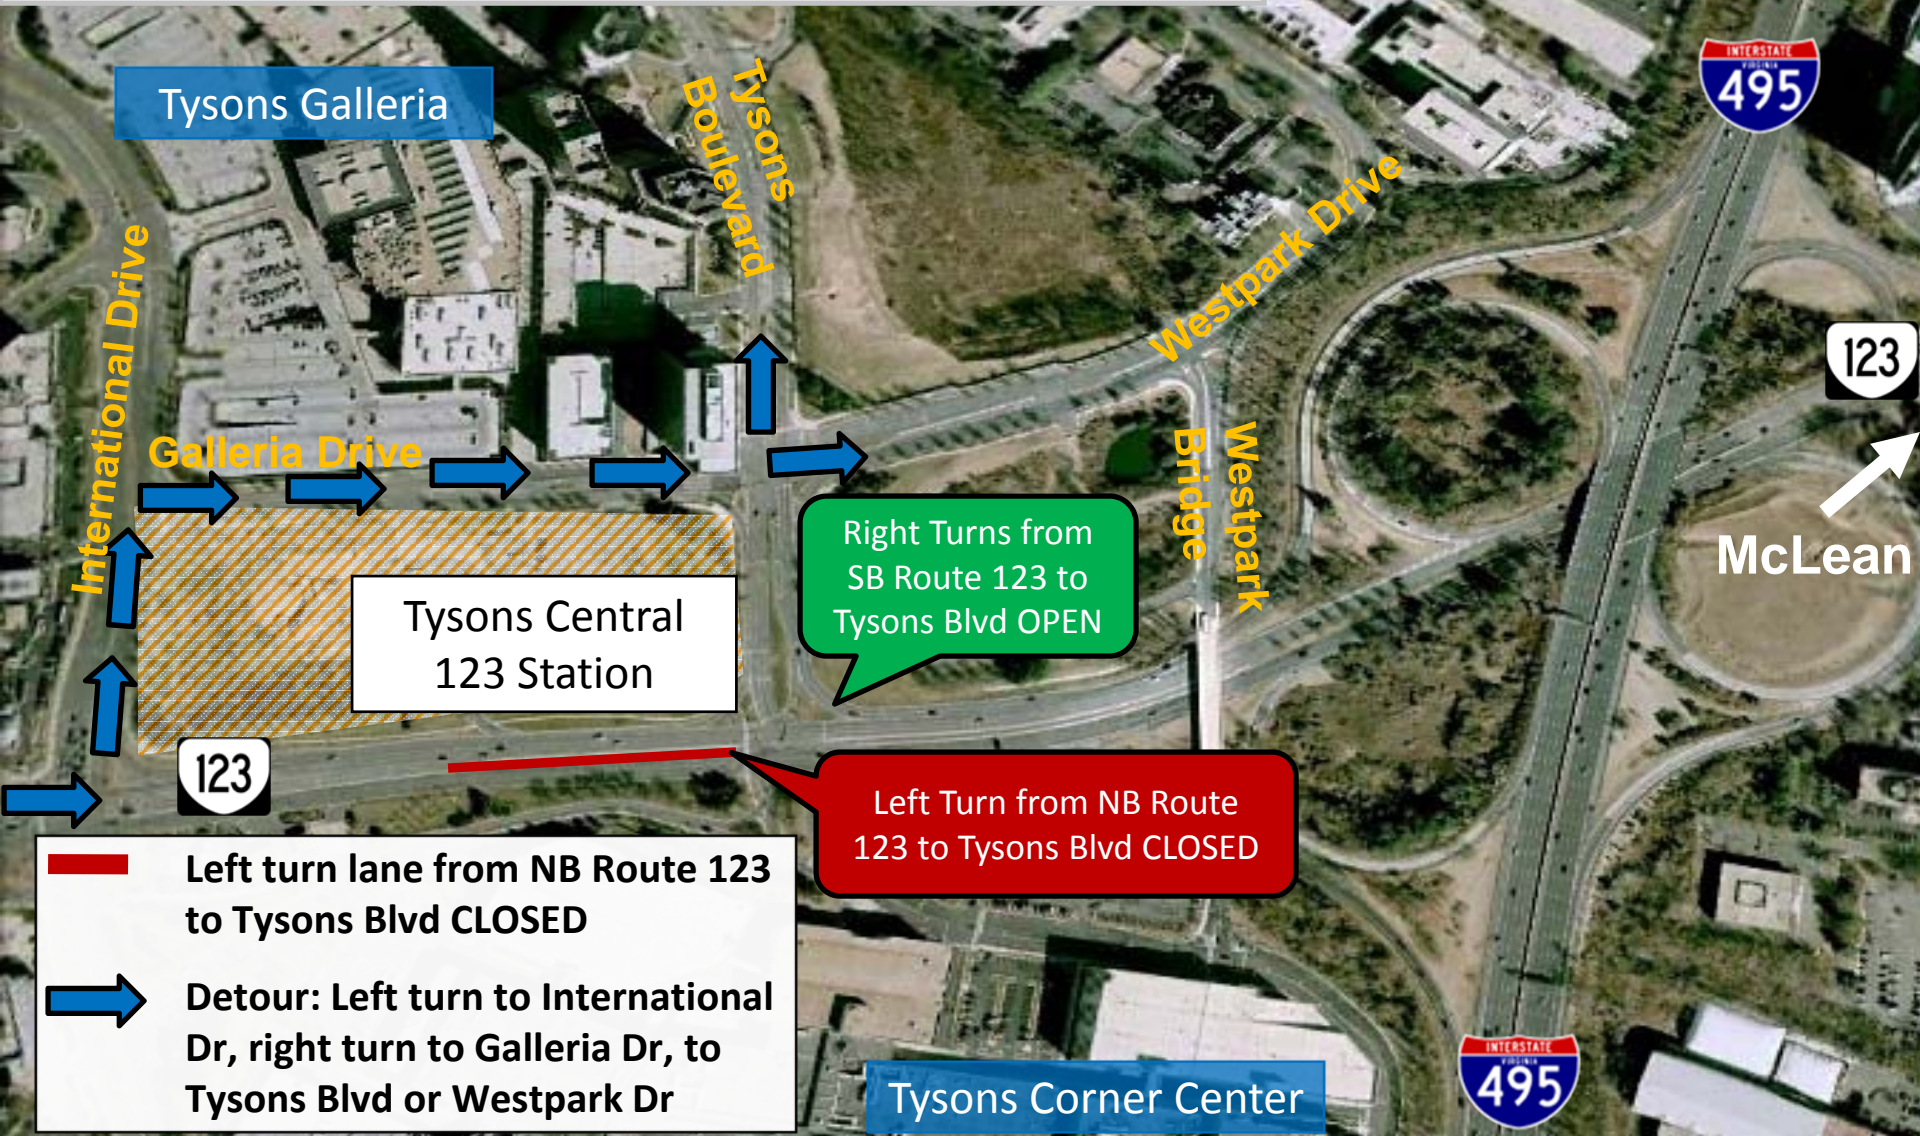

The westbound lanes of Tysons Boulevard will be closed because Dulles Corridor Metrorail Project crews are starting construction of caissons and piers to support the foundation of the Tysons Central 123 Station at the southwest corner of the Route 123 and Tysons Boulevard intersection, across from Tysons Corner Center.

Southbound traffic along Route 123 will still be able make right turns to Tysons Boulevard but the turn lanes have been altered.

This detour is immediately adjacent to the project's construction headquarters where there is a high volume of truck, equipment and auto traffic. Motorists are urged to use extreme caution in this area.

If you have any construction-related emergencies, please call the Dulles Corridor Metrorail Project Hotline at 877-585-6789. For additional information about the project, please visit our project website at www.dullesmetro.com or call 703-572-0506.

Tysons Boulevard Detour
Left Turn Lane Closure
From Northbound Route 123
Starting April 2010
