Ramp from Westbound Route 7 to Southbound Route 123 in Tysons Corner to Close Friday, Sept. 10 Through End of 2010

Beginning on or about Friday, Sept. 10, the Dulles Corridor Metrorail Project will close the ramp from westbound Leesburg Pike (Route 7) to southbound Chain Bridge Road (Route 123) for approximately four months.

Weather permitting, the ramp will close at approximately 11 p.m. Friday night. **This ramp is scheduled to be closed through approximately the end of 2010.**

Traffic will be detoured by continuing on westbound Route 7, turning right on Westpark Drive, right on International Drive, then right on to southbound Route 123.

Closing the ramp is necessary so that Dulles Corridor Metrorail Project crews can continue construction of the western end of the 2,400-foot tunnel that will carry the future rail trains from Route 123 to Route 7 to the future Tysons Central 7 station work area in the median of Route 7.

Motorists should watch for signage and use extreme caution when driving in the area.

Police will be onsite for motorist safety during the ramp closure work, but not for the entire duration of the closure.

If you have any construction-related emergencies, call the Dulles Corridor Metrorail Project Hotline at 877-585-6789.

For additional information about the project, visit our project website at **www.dullesmetro.com** or call 703-572-0506.
