

Dulles Metro is Coming

March 2010

A Year of Dulles Rail Construction Progress

Stations, Guideways, Tunnels Under Construction for Phase 1

It has been a year of progress for Dulles Rail. Since the Federal Transit Administration's approval of \$900 million in "new starts" funds to complete the financial package for construction of Phase 1 of the Dulles Corridor Metrorail Project in March 2009, construction has started all along the 11-mile alignment from East Falls Church to Reston.

More than 95 percent of the construction of manholes and duct banks necessary for relocating the 21 utilities in the Route 7 alignment area have been completed. Some overhead power lines have been permanently removed and utility crews are now working in those manholes underground to connect the new lines.

In spite of the record winter storms:

- Construction of the Wiehle Avenue Station on the eastern edge of Reston is underway.
- Crews this month will begin work on the Tysons East Station, the first of four stations that will serve Tysons Corner.
- Many of the piers are now in place for the guideway that will carry the trains from the existing Orange Line to the middle of the Dulles Connector Road and from the Dulles Connector Road to the northwest side of Route 123 near Capital One.
- Preparations for guideway work are starting at Route 7 and the Dulles Toll Road.

The outbound tunnel that will carry rail between Route 123 and Route 7 in Tysons Corner is currently 420-feet long and passes completely under International Drive. Photo by Rich Silva, Dulles Corridor Metrorail Project

- And, the mining of the two tunnels that will carry trains from Route 7 to Route 123 is proceeding on schedule. The outbound tunnel now extends completely below International Drive and mining is about 150 feet into the inbound tunnel.

Fun Facts:

- More than 1,100 are now working on Dulles Rail.
- 214 caissons, underground supports for the aerial structures, have been built.
- More than 207 concrete sections of the aerial guideway that will support the rail track have been built at a staging area at Dulles Airport.
- Bridges are under construction to carry the rail tracks over Pimmit Run, the W&OD Trail in Reston, and Magarity Road.

TRAFFIC ADVISORY SIGN UP

Keep up to date on construction. Please visit www.dullesmetro.com/info/signup.cfm to sign up for our traffic advisory/construction notification email blasts.

WANT TO KNOW MORE?

To set up a briefing for your homeowners association, civic group, professional or business group, or business, please email outreach@dullesmetro.com or call (703) 448-5550.

CONSTRUCTION HOTLINE

For construction-related emergencies, call the Dulles Corridor Metrorail Project Hotline at 877-585-6789.

For general information on the Dulles Corridor Metrorail Project, please visit our website at www.dullesmetro.com or call (703) 572-0506.

Big Changes Coming to Route 7

Heavy snow delayed plans for major changes to Route 7 in Tysons Corner until April. Here is what to expect:

- Elimination of all mid-block left turns.
- Shifting of traffic lanes on eastbound Route 7 between Route 123 and Gosnell Road to make room for construction of the Tysons Central 7 Station.
- Continuing construction of retaining walls along some sections of eastbound Route 7 where crews are elevating the existing service roads to the same grade as Route 7. This is taking place near Pike 7 Plaza and Best Buy.

Construction of retaining walls on Route 7, necessary to build up the service roads to the same grade as Route 7 for lane shifting. Photo by Dulles Corridor Metrorail Project

Old Chain Bridge Road Closing for 4 Weeks

Construction of the Metrorail Project will cause the closing of Old Chain Bridge Road between Great Falls Street and Anderson Road in the McLean area in April for approximately four weeks, pending development of detailed plans.

A large truss will be assembled at the Dulles Connector Road

Truss assembly taking place at Dulles Airport. Soon, trusses will be all along the corridor as the guideways go up to support construction. Photo by Dulles Corridor Metrorail Project

bridge over Old Chain Bridge Road. This is a very large, rigid structure that will be used to build the elevated track. It will start at the abutment and piers that are under construction where the Dulles Connector Road runs over Old Chain Bridge Road.

Residents who live along Old Chain Bridge Road will continue to have access to their houses but through traffic will be shut down. Detours will be set up to handle through traffic.

Old Chain Bridge Road is a popular shortcut for those seeking to bypass the busy Route 123/Great Falls Street/Lewinsville Road

intersection traveling to and from McLean's business district and Great Falls Street, Westmoreland and Old Dominion Drive and eventually back to Route 123 near Salona Village.

Details will be announced as soon as they are available.

Tysons East Station Construction Begins

Construction of the Tysons East Metrorail Station, the first station to be built in Tysons Corner, has started, bringing with it traffic pattern changes and detours for residents, workers, shoppers and those who use Route 123 near the Dulles Connector Road bridge.

- The right lane of southbound Route 123 from Scotts Crossing Road to the entrance ramp to northbound I-495 is closed for two years, but the ramp remains open.
- The entrance ramp for southbound Route 123 from the McLean area to the eastbound Dulles Connector Road and I-66 is closed for three months for erection of piers that will support the guideway for the rail tracks from the Dulles Connector Road to the northwest side of Route 123 and the Tysons East Station.
- Scotts Crossing Road will be narrowed.
- Caisson testing, which sounds like a small explosion, continues.

Two-Month Detour Along Tysons Boulevard

The left turn lane from northbound Route 123 to westbound Tysons Boulevard will be closed for approximately two months starting in mid-April as work begins on the Tysons Central 123 Station.

Traffic will be detoured to International and Galleria Drives. Southbound Route 123 traffic will continue to make right turns to Tysons Boulevard.

Pedestrian Bridge Begins at Wiehle Station Site

Travelers on the Dulles international Airport Access Highway will continue to see narrowed lanes between Wiehle Avenue and Reston Parkway because of Wiehle Avenue Metrorail Station construction.

Some lanes will be closed on the Dulles Toll Road where foundations will be built for piers that will support pedestrian bridges connecting the station to both sides of the Airport Highway/Toll Road.
